

OLUWAFEMI V. JACOB

BACKEND ENGINEER | JAVA | JAVASCRIPT | TYPESCRIPT | PYTHON | GOLANG |
REACT | BLOCKCHAIN

PROFESSIONAL SUMMARY

Engineering high-impact backend and blockchain solutions, I excel at transforming ideas into scalable, reliable software. Skilled in Java, Python, TypeScript, Golang, C#, Move, Solidity, React, and cloud ecosystems, I build APIs, automate workflows, and integrate smart contracts with precision. Recognized for improving system performance, mentoring developers, and leading agile teams, I deliver solutions that solve real-world problems. From database optimization to CI/CD pipelines, I thrive in collaborative environments, delivering innovative, production-ready applications that enhance efficiency, reliability, and user satisfaction across diverse projects.

WORK EXPERIENCE

Backend Engineer

Brickpine (Remote)

November 2024 – Present

- Building and maintaining backend services for social media and e-commerce platforms using TypeScript, Node.js, and AWS.
- Developing authentication, user management, and product flow APIs, ensuring secure and efficient data handling.
- Optimizing API architecture and database queries, improving system response time and reducing latency.
- Creating comprehensive API documentation using Swagger/OpenAPI to facilitate seamless integration with frontend teams.
- Collaborating with frontend and QA teams, troubleshooting complex issues and implementing solutions that enhanced overall platform stability.

Software Engineer / Facilitator

Semicolon Africa, Yaba, Lagos

May 2024 – December 2025

- Designing and deploying full-stack applications using Java Spring Boot and React, improving system performance and scalability by 30%.
- Mentoring and training 50+ aspiring software engineers, focusing on backend architectures, API integration, and coding best practices.
- Integrating blockchain solutions including wallet authentication, NFT features, and smart contract workflows for innovative dApps.
- Conducting rigorous code reviews and debugging sessions, reducing production errors and improving overall code quality.
- Collaborating with cross-functional teams to implement agile development practices, streamline deployment pipelines, and optimize system efficiency.

CORE COMPETENCIES

Hard Skills:

- Java Development & Spring Boot
- Python Programming & FastAPI
- TypeScript & Node.js Backend Development
- Golang for Scalable Systems
- C#, Move, Solidity
- React.js & Frontend Integration
- Blockchain Development (Smart Contracts, NFT, Wallet Integration)
- REST API Design & Documentation (Swagger/OpenAPI)
- Database Management: MySQL, MongoDB, PostgreSQL, DynamoDB
- Cloud & DevOps Tools: AWS, Docker, CI/CD Pipelines
- Agile/Scrum Development Methodologies

Soft Skills:

- Problem Solving & Analytical Thinking
- Mentoring & Team Leadership
- Cross-functional Collaboration
- Project Planning & Time Management

EDUCATION

Diploma in Business Education

Henley Business School, United Kingdom

2025

Bachelor of Science in Computer Science

Ahmadu Bello University, Zaria, Nigeria

2022

Fullstack Engineer

Mustard BioPharma (Remote)

June 2022 – March 2024

- Architected and deployed backend modules for automating end-to-end cancer drug manufacturing workflows using Python and FastAPI.
- Integrated multiple scientific and pharmaceutical protocols into unified, scalable backend systems, reducing manual errors.
- Developed modules for batch tracking, data processing, and quality verification, improving operational efficiency.
- Collaborated closely with scientists, lab engineers, and product teams, translating experimental procedures into production-ready software.
- Implemented robust testing and monitoring processes, ensuring reliable deployment and compliance with workflow standards.

KEY PROJECTS

MintEasy App — [View Project](#)

- Built a decentralized NFT dApp with wallet authentication and user management.
- Developed smart contracts for NFT minting, transfer, and management.

QuickBlog Generator — [View Project](#)

- Built an AI-powered blogging platform with content generation and backend APIs for user and content management.

LANGUAGE(S)

English: Fluent
